

Make the Word

Determine the appropriate power tile (i.e., J,Q,X, or Z) that can be added to the six letters provided to make a seven letter word. Write the words (answers, ANS) in the blanks provided. Note: There may be more than one answer because either there is more than one power tile that works or more than one word can be made with a given power tile. The number of correct answers, if more than one, is provided in parentheses.
